## INVESTMENT OBJECTIVE

The fund seeks to provide long-term capital appreciation and invests in high-quality companies that the Fund Manager believes will generate superior returns over the long-term. Such companies typically have a franchise in the form of a hard-to-replicate intangible asset (such as a brand, culture or intellectual property) that leads to an enduring competitive advantage and a dominant market position.

## FUND MANAGER COMMENTARY - SEPTEMBER 2020

The fund delivered a return of -2.9% over the month, which was slightly ahead of its MSCI ACWI benchmark return of -3.2%. The fund is also ahead of its benchmark since inception. Netease and Facebook were two of our laggards for the month, but they have performed well year-to-date, up a meaningful 50% and 90% respectively, so some consolidation should be expected. Our largest contributors for the month were Trupanion, Zalando and Cartrack.

## INVESTMENT COMMENTARY

The S&P 500 Index weakened in September but has still delivered a positive return year-to-date, despite Covid. By comparison, most other stock indices have delivered negative returns year-to-date.

The campaign trail in the US is starting to take centre stage and promises to be an ‘entertaining’ affair. The first of 3 presidential debates between Trump and Biden descended into (not unexpected) chaos, with the candidates interrupting each other frequently, including petty name calling. That Trump refused to condemn white supremacist groups – and the recent revelation that he only paid US\$750 in taxes in both 2016 and 2017 – may have put him on the back foot.

The clock is also ticking on the 31<sup>st</sup> of October deadline for a post-Brexit trade deal being negotiated between the UK and EU. Many political pundits are now placing a low probability on a deal being reached, mainly as a result of the UK signalling that it intends to renege on commitments made in its Brexit Withdrawal Treaty and,

in so doing, undermining the goodwill of the EU. Predictably, this has been negative for the pound, which depreciated 3.45% against the US dollar during the month, and has also depreciated against the US dollar year-to-date.

We’re noticing a worrying trend emerging, of people and parties wilfully ignoring terms of contracts entered into – with seeming impunity. This is evident both with the Brexit Withdrawal Treaty and LVMH’s deal to acquire Tiffany. LVMH is alleged to have colluded with the French Foreign Ministry to ensure the completion of the transaction would only happen outside the deal’s ‘drop-dead’ date.

Elsewhere, the relationship between China and the US continues to sour, although Trump has given his support to the sale of a minority stake in TikTok’s global operations to Oracle, which will avoid the app being banned in the US. Japan has also elected a new prime minister to replace Shinzo Abe.

**TER**  
The Flagship Global Icon Fund Class A USD has an estimated Total Expense Ratio (TER) of 1.40%. The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. As the fund has been operational for a period of less than one year, the TER to 31 August 2020 is based on estimated data on costs and actual fees incurred. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

### Risk Considerations and Important Information

- Collective investments are generally medium to long term investments. The value of units may go down as well as up, and past performance is not necessarily a guide to the future. Investment in the Fund entails risks which are detailed in The Supplement.
- Fund share prices per class are calculated on a net asset value basis, which is the total value of all assets in the portfolio attributable to a share class including any income accruals and less any permissible deductions (such as brokerage, taxation, auditor’s fees, bank charges, director and custodian fees and the annual management fee) from the portfolio, divided by the number of Fund shares of the class in issue.
- Portfolio performance is calculated on a NAV to NAV basis. Dividends will be paid in accordance with the Scheme and Cell Particulars.
- Collective investments are traded at ruling prices. Commission and incentives may be paid. All performance is calculated Total Return, Net of all fees and commissions and in US dollar terms. Forward pricing is used. Up to date Fund prices per share are available on [www.bloomberg.com](http://www.bloomberg.com) or upon request from the Manager or Administrator.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Investment performance calculations are available for verification upon request. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date.
- The Fund may invest in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.
- Fluctuations in the value of the underlying assets and the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.
- Deductions of charges and expenses mean that you may not get back the amount you invested.
- The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.
- Notwithstanding ongoing monitoring of the underlying assets within the Fund, there can be no assurance that the performance of the Fund will achieve its stated objectives.
- The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realizable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund’s dealing days.
- No borrowing will be undertaken by the Fund save for the purpose of short term liquidity requirements. Borrowings will not exceed 10% of the NAV of the Fund. For such purpose the securities of the Fund may be pledged. No scrip borrowing will be allowed.
- The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.
- Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.
- Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.
