Fund Classification Multi Asset - High Equity

FUND OBJECTIVE

The objective of the Flagship IP Prudential Variable Fund is to seek steady growth of both capital and income through investments in a broad range of asset classes in a balanced manner. This Regulation 28 managed fund is classified as South African - Multi Asset - High Equity and aims to maximize returns over the medium to long term utilising flexible asset allocation strategies taking active decisions in accordance with current and projected economic and market conditions. The fund invests in equities, bonds, property and money market and is restricted to maximum limits in accordance with prudential regulations which, inter alia, provide that equity, held both locally and abroad, will not exceed 75% of the fund and offshore investment is restricted to 30% of the fund. Out-performance is targeted through aggressive asset allocation and focused stock selection based on in-house proprietary models and extensive internal and external research. The portfolio uses financial instruments only to the extent permitted by legislation.

FUND COMMENTARY - FEBRUARY 2020

The fund contracted 1.3% over the month, comfortably outperforming the JSE's 9.0% decline and the benchmark's -4.5%. The one year return (+6.4%) continues to outperform the fund's sector average benchmark (-1.7%). In light of the current market uncertainty (and volatility!), we meaningfully reduced our equity exposure (>10%) by selling down selective stocks and redeeming positions in two of our third party fund holdings. We believe it prudent to have cash on hand to put to good use when valuations fall to compelling levels and the extent of the virus on global growth, and corporate earnings, becomes clearer.

As required by legislation, we confirm that the fund has adhered to its policy objective and strategy.

MARKET COMMENTARY

International

March has been the most eventful month for equities in a long time. The cause has been the global fallout from the Coronavirus. To date the number of those infected is over ninety thousand and the number of confirmed deaths over three thousand. While the virus was originally confined to Asia, we are beginning to see outbreaks in Europe, North America, and closer to home in Nigeria and Algeria. After its muted initial response, markets have started to price in a far more serious fall-out. In fact, during the last week of February, the decline in equity prices was the largest fall on the S&P since the global financial crisis of 2008 (-12%).

While, to paraphrase the words of Rudyard Kipling, we as investors "should keep our heads when all those about us are losing theirs", we also need to be alert to potential tail risk scenarios and the probability that those materialize. As such, we are monitoring developments closely.

The first order impacts of the Coronavirus were felt by companies who are in the travel industry or outdoor entertainment industries (Walt Disney, Informa).

Next affected have been those companies who have large direct supply chain exposure to China (Apple, Samsung) or companies that rely on the region for a large proportion of their sales (the luxury goods companies).

We are now beginning to see the effects spread more broadly as the revenues of all companies are a derivative of economic growth, to a lesser or greater extent.

South Africa

News in South Africa was dominated by the budget speech. While the markets initial response was favourable, this optimism was supplanted with scepticism as the budget relies on large cuts in the government's wage bill which have been very hard to implement in the past. Cosatu and other trade unions, on cue, were quick to express their opposition and have now lodged a formal dispute.

While many market participants have factored in an investment downgrade to junk status by Moody's, passive investors can only react after the fact – and so further rand weakness is likely.

Risk Considerations and Important Information

- Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments.
- The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. The manager does not provide any guarantee either with respect to the capital or the
- Unit trusts are traded at ruling prices and can engage in scrip lending subject to the limits and conditions imposed by the Act.
- The manager may borrow up to 10% of the market value of the collective investment scheme portfolio to ensure liquidity.
- Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, Uncertificated Securities Tax, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue
- A schedule of fees, charges and maximum commissions is available on request. Commission and incentives may be paid, and if so, are included in the overall costs.
- The unit trust portfolios are priced daily at 15h00 (quarter end 17h00), using forward pricing. Dealing cut-off time is 14h30 daily.
- Units will be repurchased by the manager at the ruling price calculated in accordance with the requirements of the Act and the relevant deeds and paid to the investor only. Subject to occurrences beyond the control of Flagship Asset Management (FAM), transaction requests received by FAM before 14h30 will be actioned at that day's price. Monies from the repurchase of units will not be paid to third party bank accounts.
- FAM reserves the right to repurchase unit balances with a market value less than the minimum monthly investment amount and close the investment account. Investors will be notified beforehand should this be contemplated.
- Portfolio performance is calculated on a NAV to NAV basis and does not take any initial fees into account. Figures quoted are from Reuters and Moneymate for a lump sum using NAV-NAV prices with income distributions reinvested. Income is reinvested on the ex-dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Investment performance calculations are available for verification up request.
- Income distributions for the fund occur bi-annually on 31 March and 30 September
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request
- SARS requires us to pay over Dividend Withholding Tax (DWT) on your behalf where applicable. We will deduct this tax before we pay any dividends to you or reinvest into your account. Unless we receive information from you indicating otherwise, we will be obliged to withhold the default DWT of 20%.
- The EAC is a standard industry measure which has been introduced to allow you to compare the charges you incur and their impact on the investment returns over specific periods. Please visit http://www.ipmc.co.za/effectiveannual-cost to address the EAC illustrator. You can request an EAC calculation from clientservices@ipmc.co.za or call us on 021 673-1340
- Fund prices are published daily and available in newspapers countrywide, as well as on our website, www.flagshipsa.com. Also available on our website is additional information on the unit trust portfolio, including our Application Form. FAM reserves the right to only process instructions that are submitted on FAM standard transaction forms.
- Flagship Asset Management (Pty) Ltd is an authorised financial services provider (FSP 577). Trustees / custodians for the scheme are Standard Bank of South Africa Ltd contact compliance-IP@standardbank.co.za. IP Management Company Reg. No. 2007/01760/07 is the authorised manager of the scheme – contact 021 673 1340 or clientservice@ipmc.co.za. IP Management Company (RF) (Pty) Ltd is a member of the Association for Savings & Investment SA (ASISA).
- The Manager retains full legal responsibility of the Fund, regardless of co-naming arrangements.
- Additional information including the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from info@flagshipsa.com.
- A statement of changes in the composition of the portfolio during the reporting period is available on request.
- Complaints should be in writing and clearly marked for the attention of the Compliance Officer and should be mailed to Private Bag X21, Constantia, 7848.

Investment Policy

Investment Policy
The Flagship IP Prudential Variable Fund is to be a domestic, asset-allocation, prudential variable portfolio. The primary objective of the fund is to seek steady but stable growth of both capital and income through investments in a broad range of asset classes in a balanced manner. In order to achieve its objective, the investments normally to be included will comprise a combination of securities in the equity, bond, property and money markets. The portfolio will have an equity exposure (including international equity) between 0% and 75% at all times. Investments to be included in the Flagship IP Prudential Variable Fund will comprise a combination of securities and assets in liquid form which are considered consistent with the portfolio's primary objective and that the Act or the Registrar may from time to time allow, all to be acquired at fair market value. The portfolio may also include participatory interests or any other form of participation in portfolios of collective investment schemes registered in South Africa or operated in territories with a regulatory environment which is to the satisfaction of the Manager and the Trustee and as legislation permits. Nothing contained in the investment policy shall preclude the manager from varying the ratio of the aforementioned securities relative to each other (except as required by the Act), or the assets themsevless, to maximise capital growth and investment potential, should changing economic factors or market conditions so demand. Provided also that nothing contained in the investment policy shall preclude the Manager from retaining cash in the portfolio and / or placing cash on deposit in terms of the deed. Provided further that the Manager shall ensure that the portfolio includes securities and assets in liquid form, of at least the aggregate value required, from time to time, by the Act. The Manager will be permitted to invest on behalf of the portfolio in financial instruments as legislation permits. The Manager will be permitted to inv

TER and Transaction Costs

From 1 January 2017 to 31 December 2019 2.41% of the value of the fund was incurred as expenses relating to the administration of the fund. 0.34% of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund. Therefore, 2.75% of the value of the fund was incurred as costs relating to the investment of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

Fund Risk Profile

The fund managers seek to reduce risk by investing in a range of assets diversified across sectors and geographies, with the flexibility to vary exposures as market circumstances dictate.

- Shares are potentially volatile investments and there is a risk of capital loss over the short term.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information
- Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down
