## INVESTMENT OBJECTIVE

The fund seeks to provide long-term capital appreciation and invests in high-quality companies that the Fund Manager believes will generate superior returns over the long-term. Such companies typically have a franchise in the form of a hard-to-replicate intangible asset (such as a brand, culture or intellectual property) that leads to an enduring competitive advantage and a dominant market position.

The largest contributors to performance were Tencent (+16%), HDFC Bank (+15%) and Capri Holdings (+18%). ## INVESTMENT COMMENTARY

The US election dominated October headlines, with voting to be held on November 3. By November 2, over 93 million Americans had already voted, equal to 58.6% of the total votes cast in the 2016 general election. High voter turnout is a sign of the anxiety and polarisation surrounding the election.

The election process has been predictably raucous, with social media companies making enormous efforts to prevent the spread of false news pertaining to the candidates. Predictions, for what they are worth, are for a Biden win.

The S&P 500 pared its gains in the month, leaving it up just 1.2% year-to-date. The final week of October also saw the Nasdaq lose 5.5%, but is still up a healthy +26% year-to-date. Over the next few weeks the markets will digest the winning candidate, or digest the fact that the incumbent may refuse to

accept the results, as he has threatened.

U.K. and European Union officials continue to work on a solution to break the eight-month deadlock over one of the biggest obstacles to their planned trade deal. The British finance minister, Rishi Sunak, has warned colleagues that a second lockdown has thrown the Government's ability to maintain current levels of spending on public services into doubt.

Oil plunged to a five-month low as Libya continued to ramp up crude production after a truce in its civil war, while a resurgent coronavirus prompted tighter lockdown measures in Europe.

<b>TER</b>		
The Flagship Global Icon Fund Class A USD has an estimated Total Expense Ratio (TER) of 1.40%. The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. As the fund has been operational for a period of less than one year, the TER to 31 August 2020 is based on estimated data on costs and actual fees incurred. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.		

### Risk Considerations and Important Information

- Collective investments are generally medium to long term investments. The value of units may go down as well as up, and past performance is not necessarily a guide to the future. Investment in the Fund entails risks which are detailed in The Supplement.
- Fund share prices per class are calculated on a net asset value basis, which is the total value of all assets in the portfolio attributable to a share class including any income accruals and less any permissible deductions (such as brokerage, taxation, auditor's fees, bank charges, director and custodian fees and the annual management fee) from the portfolio, divided by the number of Fund shares of the class in issue.
- Portfolio performance is calculated on a NAV to NAV basis. Dividends will be paid in accordance with the Scheme and Cell Particulars.
- Collective investments are traded at ruling prices. Commission and incentives may be paid. All performance is calculated Total Return, Net of all fees and commissions and in US dollar terms. Forward pricing is used. Up to date Fund prices per share are available on [www.bloomberg.com](http://www.bloomberg.com) or upon request from the Manager or Administrator.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Investment performance calculations are available for verification upon request. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date.
- The Fund may invest in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.
- Fluctuations in the value of the underlying assets and the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.
- Deductions of charges and expenses mean that you may not get back the amount you invested.
- The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.
- Notwithstanding ongoing monitoring of the underlying assets within the Fund, there can be no assurance that the performance of the Fund will achieve its stated objectives.
- The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realizable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.
- No borrowing will be undertaken by the Fund save for the purpose of short term liquidity requirements. Borrowings will not exceed 10% of the NAV of the Fund. For such purpose the securities of the Fund may be pledged. No scrip borrowing will be allowed.
- The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.
- Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.
- Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.
