Income declaration - Sep '20	0.0c
Dealing	Daily

FUND OBJECTIVE

The fund invests directly into the Flagship Global Icon Fund IC Limited, registered in Guernsey. That fund seeks to provide long-term capital appreciation by investing in high-quality companies that the Fund Manager believes will generate superior returns over the long-term. Such companies typically have a franchise in the form of a hard-to-replicate intangible asset (such as a brand, culture or intellectual property) that leads to an enduring competitive advantage and a dominant market position.

PERFORMANCE CHART

To comply with regulatory requirements, performance is not provided until the fund has been operational for a period of at least six months.

FUND EXPOSURES

Equity	88.5%
Alibaba	7.6%
Zalando SE	6.3%

Note that as the fund has been operational for less than 1 year, the TER provided is an estimate.

FUND COMMENTARY - OCTOBER 2020

Your fund returned -0.8% for the month. Since inception the fund has returned -2.9% after all fees, versus its benchmark of -8.7%. The largest contributors to performance were Tencent (+13%), HDFC Bank (+12%) and Capri Holdings (+14.9%). The largest detractors were Global Payments (-13.5%), Square Enix (-13.5%) and TCS Group (-12%). The largest contributors since inception are Zalando, Alibaba and Trupanion. No new positions were added in the month.

As required by legislation, we confirm that the fund has adhered to its policy objective and strategy.

MARKET COMMENTARY

International

The US election dominated October headlines, with voting to be held on November 3. By November 2, over 93 million Americans had already voted, equal to 58.6% of the total votes cast in the 2016 general election. High voter turnout is a sign of the anxiety and polarisation surrounding the election.

The election process has been predictably raucous, with social media companies making enormous efforts to prevent the spread of false news pertaining to the candidates. Predictions, for what they are worth, are for a Biden win.

The S&P 500 pared its gains in the month, leaving it up just 1.2% year-to-date. The final week of October also saw the Nasdaq lose 5.5%, but is still up a healthy +26% year-to-date. Over the next few weeks the markets will digest the winning candidate, or digest the fact that the incumbent may refuse to accept the results, as he has threatened.

U.K. and European Union officials continue to work on a solution to break the eight-month deadlock over one of the biggest obstacles to their planned trade deal. The British finance minister, Rishi Sunak, has warned colleagues that a second

lockdown has thrown the Government's ability to maintain current levels of spending on public services into doubt.

Oil plunged to a five-month low as Libya continued to ramp up crude production after a truce in its civil war, while a resurgent coronavirus prompted tighter lockdown measures in Europe.

South Africa

South Africa's medium-term budget speech was released in October. In it, the finance minister outlined plans to reduce government spending on wages, while also increasing hand-outs to SAA and selected other entities that have been impacted by the COVID pandemic. Moodys rating agency was not positive, saying the speech does not outline how and when the government will implement policies to boost growth and arrest the deterioration in public finances. They expect the economy will remain subdued, with little room for fiscal consolidation, and hence a sustained rise in government debt. The Rand ended the month down 13.9% year-to-date against the dollar and 17% against the Euro. The JSE All Share lost 4.7% in the month and is now down 7.1% year-to-date, which is -21% in dollars.

Risk Considerations and Important Information

- Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments.
- The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio.
- Unit trusts are traded at ruling prices and can engage in scrip lending subject to the limits and conditions imposed by the Act.
- The manager may borrow up to 10% of the market value of the collective investment scheme portfolio to ensure liquidity.
- Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, Uncertificated Securities Tax, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue.
- A schedule of fees, charges and maximum commissions is available on request. Commission and incentives may be paid, and if so, are included in the overall costs.
- The unit trust portfolios are priced daily at 15h00 (quarter end 17h00), using forward pricing. Dealing cut-off time is 14h30 daily.
- Units will be repurchased by the manager at the ruling price calculated in accordance with the requirements of the Act and the relevant deeds and paid to the investor only. Subject to occurrences beyond the control of Flagship Asset Management (FAM), transaction requests received by FAM before 14h30 will be actioned at that day's price. Monies from the repurchase of units will not be paid to third party bank accounts.
- FAM reserves the right to repurchase unit balances with a market value less than the minimum monthly investment amount and close the investment account. Investors will be notified beforehand should this be contemplated.
- Portfolio performance is calculated on a NAV to NAV basis and does not take any initial fees into account. Figures quoted are from Reuters and Moneymate for a lump sum using NAV-NAV prices with income distributions reinvested. Income is reinvested on the ex-dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Investment performance calculations are available for verification upon request.
- Income distributions for the fund occur bi-annually on 31 March and 30 September.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request.
- SARS requires us to pay over Dividend Withholding Tax (DWT) on your behalf where applicable. We will deduct this tax before we pay any dividends to you or reinvest into your account. Unless we receive information from you indicating otherwise, we will be obliged to withhold the default DWT of 20%.
- The EAC is a standard industry measure which has been introduced to allow you to compare the charges you incur and their impact on the investment returns over specific periods. Please visit <http://www.ipmc.co.za/effectiveannual-cost> to address the EAC illustrator. You can request an EAC calculation from clientservices@ipmc.co.za or call us on 021 673-1340
- Fund prices are published daily and available in newspapers, on Bloomberg (Class A: BBG00XGC3Y32 | Class B: BBG00XGC5D09), as well as on our website, www.flagshipsa.com. Also available on our website is additional information on the unit trust portfolio, including our Application Form. FAM reserves the right to only process instructions that are submitted on FAM standard transaction forms.
- Flagship Asset Management (Pty) Ltd is an authorised financial services provider (FSP 577). Trustees / custodians for the scheme are Standard Bank of South Africa Ltd – contact compliance-IP@standardbank.co.za. IP Management Company Reg. No. 2007/01760/07 is the authorised manager of the scheme – contact 021 673 1340 or clientservice@ipmc.co.za. IP Management Company (RF) (Pty) Ltd is a member of the Association for Savings & Investment SA (ASISA).
- The Manager retains full legal responsibility of the Fund, regardless of co-naming arrangements.
- Additional information including the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from info@flagshipsa.com.
- A statement of changes in the composition of the portfolio during the reporting period is available on request.
- Complaints should be in writing and clearly marked for the attention of the Compliance Officer and should be mailed to Private Bag X21, Constantia, 7848.

Investment Policy

The Flagship IP Global Icon Feeder Fund is in the Global - Equity - General sector and invests directly into the Flagship Global Icon Fund IC Limited, registered in Guernsey. That fund seeks to provide long-term capital appreciation by investing in high-quality companies that the Fund Manager believes will generate superior returns over the long-term. Such companies typically have a franchise in the form of a hard-to-replicate intangible asset (such as a brand, culture or intellectual property) that leads to an enduring competitive advantage and a dominant market position. The fund will, at all times, be fully invested in the master fund and, as such, does not allow for any asset allocation flexibility and will not invest in any financial instruments to implement specific investment views.

TER and Transaction Costs

From 30 July 2020 to 30 September 2020 1.45% of the value of the fund was incurred as expenses relating to the administration of the fund. 0.00% of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund. Therefore, 1.45% of the value of the fund was incurred as costs relating to the investment of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. Note that as the fund has been operational for less than 1 year, the TER provided is an estimate.

Fund Risk Profile

- The fund managers seek to reduce risk by investing in a range of assets diversified across sectors and geographies, with the flexibility to vary exposures as market circumstances dictate.

- Shares are potentially volatile investments and there is a risk of capital loss over the short term.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.
- Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
