INVESTMENT OBJECTIVE

The fund seeks to provide long-term capital appreciation and invests in high-quality companies that the Fund Manager believes will generate superior returns over the long-term. Such companies typically have a franchise in the form of a hard-to-replicate intangible asset (such as a brand, culture or intellectual property) that leads to an enduring competitive advantage and a dominant market position.

FUND MANAGER COMMENTARY - NOVEMBER 2020

The Flagship Global Icon Fund returned a very healthy 10.7% in USD for the month, but slightly underperformed its benchmark which delivered a return of 12.3%. This can largely be attributed to a large risk-on rally which saw lower quality stocks outperform the higher quality stocks in which Icon invests. The Icon Fund is comfortably ahead of its benchmark when measured from its inception date of 30 July 2020 (+18.5% vs +12.6%).

INVESTMENT COMMENTARY

November saw Biden triumph in the US election, notwithstanding that Trump remains reluctant to concede Biden's victory. Should the Democrats win the two Georgian Senate seats which are up for re-election in January, they will be in control of both the Congress and the Senate – *and* have their candidate installed as president.

It was also revealed that three Covid vaccines were shown to be effective in preliminary trials. The Astrazeneca vaccine demonstrates particular promise because it can be stored more easily and it will be made available at a lower price point. This caused markets to rally, despite the fact that the threat of further lockdowns looms ominously over Western Europe.

The S&P 500 rose 12.4% in dollars during the month and is now up almost

14% year-to-date, while the Nasdaq, with its higher tech weighting, is up a massive 37%. Who would have anticipated these year-to-date moves back in March '20?

In sympathy with the widespread risk-on appetite, Brent rose 27% during the month, while gold, which is a safe-haven asset, weakened by 5.4%.

Brexit negotiations create continued uncertainty with neither party prepared to give an inch on the "level playing field" as well as fishing rights within British waters. This uncertainty has seen the pound underperform other developed world currencies year-to-date. Most analysts, however, continue to expect a last-minute deal to be announced before the revised 31 December deadline.

TER

The Flagship Global Icon Fund Class A USD has an estimated Total Expense Ratio (TER) of 1.40%. The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. As the fund has been operational for a period of less than one year, the TER to 30 November 2020 is based on estimated data on costs and actual fees incurred. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Risk Considerations and Important Information

- Collective investments are generally medium to long term investments. The value of units may go down as well as up, and past performance is not necessarily a guide to the future. Investment in the Fund entails risks which are detailed in The Supplement.
- Fund share prices per class are calculated on a net asset value basis, which is the total value of all assets in the portfolio attributable to a share class including any income accruals and less any permissible deductions (such as brokerage, taxation, auditor's fees, bank charges, director and custodian fees and the annual management fee) from the portfolio, divided by the number of Fund shares of the class in issue.
- Portfolio performance is calculated on a NAV to NAV basis. Dividends will be paid in accordance with the Scheme and Cell Particulars.
- Collective investments are traded at ruling prices. Commission and incentives may be paid. All performance is calculated Total Return, Net of all fees and commissions and in US dollar terms. Forward pricing is used. Up to date Fund prices per share are available on www.bloomberg.com or upon request from the Manager or Administrator.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Investment performance calculations are available for verification upon request. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date.
- The Fund may invest in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.
- Fluctuations in the value of the underlying assets and the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.
- Deductions of charges and expenses mean that you may not get back the amount you invested.
- The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.
- Notwithstanding ongoing monitoring of the underlying assets within the Fund, there can be no assurance that the performance of the Fund will achieve its stated objectives.
- The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realizable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.
- No borrowing will be undertaken by the Fund save for the purpose of short term liquidity requirements. Borrowings will not exceed 10% of the NAV of the Fund. For such purpose the securities of the Fund may be pledged. No scrip borrowing will be allowed.
- The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.
- Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.
- Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.
