INVESTMENT OBJECTIVE

The fund seeks to provide long-term capital appreciation and invests in high-quality companies that the Fund Manager believes will generate superior returns over the long-term. Such companies typically have a franchise in the form of a hard-to-replicate intangible asset (such as a brand, culture or intellectual property) that leads to an enduring competitive advantage and a dominant market position.

FUND MANAGER COMMENTARY - NOVEMBER 2021

The Flagship Global Icon Fund generated a return of -4.7% in dollars for the month, behind its MSCI ACWI benchmark, which delivered a negative return of -2.4%. 2021 has been a period of poor performance so far, especially when compared against the excellent performance of 2020. The road to superior long-term performance is not always a smooth one, but the rewards are worth it. While the share price of some of our holdings has been weak, their operational delivery continues to be excellent. As an example, one of our large detractors, Brazilian bank Pagseguro, has sold off 40% despite reporting 55% revenue growth in its latest set of results, handsomely beating consensus estimates. In the words of Warren Buffett: "In the short run, the market is a voting machine, but in the long run, it is a weighing machine". We continue to believe that you are part owners in a collection of businesses that will deliver superior long-term performance. Thank you for your continued support.

INVESTMENT COMMENTARY

November was marred by the discovery of the Omicron Covid variant which, apart from upending everyone's December travel plans, caused a predictable sell-off in assets globally. Both the S&P 500 and the MSCI ACWI closed the month down, with the S&P down 0.7%, and the MSCI ACWI down 2.4%. Brent crude closed the month at \$70 per barrel, well below its peak of above \$80 per barrel. Even bonds and gold ended the month lower, although the magnitudes of their moves were less severe.

Little is currently known about the Omicron variant in terms of transmissibility, severity of symptoms, or immunity to available vaccines. Commentaries are liberally interspersed with the words "could" and "may", and many experts stand on opposite sides of the debate. The world, however, was quick to react by instituting travel bans, despite their questionable efficacy. Unfortunately, South Africa was the target of many of these bans and this may further delay the country's recovery.

We have done an evaluation of the holdings within your portfolios and believe they should be robust regardless of what transpires. Many of the stocks we hold on your behalf would actually be beneficiaries of a resumption of hard lockdowns, including most of the ecommerce and internet businesses we hold. There are some that would be negatively impacted – but even these companies are far better positioned than a year ago – running with leaner cost structures and much stronger balance sheets. All in all, from an investment perspective, you should be far less worried about Omicron than media coverage seems to suggest.

TER

The Flagship Global Icon Fund Class A USD has an estimated Total Expense Ratio (TER) of 1.40%. The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. As the Fund has been operational for a period of less than one year, the TER to 30 June 2021 is based on estimated data on costs and actual fees incurred. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Risk Considerations and Important Information

- Collective investments are generally medium to long term investments. The value of units may go down as well as up, and past performance is not necessarily a guide to the future. Investment in the Fund entails risks which are detailed in The Supplement.
- Fund share prices per class are calculated on a net asset value basis, which is the total value of all assets in the portfolio attributable to a share class including any income accruals and less any permissible deductions (such as brokerage, taxation, auditor's fees, bank charges, director and custodian fees and the annual management fee) from the portfolio, divided by the number of Fund shares of the class in issue.
- Portfolio performance is calculated on a NAV to NAV basis. Dividends will be paid in accordance with the Scheme and Cell Particulars.
- Collective investments are traded at ruling prices. Commission and incentives may be paid. All performance is calculated Total Return, Net of all fees and commissions and in US dollar terms. Forward pricing is used. Up to date Fund prices per share are available on www.bloomberg.com or upon request from the Manager or Administrator.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request. Investment performance calculations are available for verification upon request. The performance is calculated for the Fund. The individual investor performance may differ, as a result of various factors, including the actual investment date, the date of reinvestment and dividend withholding tax.
- The Fund may invest in other collective investments, which levy their own charges. This could result in a higher fee structure for the Fund.
- A schedule of fees and charges and maximum commissions is available on request from the Manager.
- Fluctuations in the value of the underlying assets and the income from them and changes in interest rates mean that the value of the Fund and any income arising from it may fall, as well as rise, and is not guaranteed.
- Deductions of charges and expenses mean that you may not get back the amount you invested.
- The fees charged within the Fund and by the managers of the underlying funds are not guaranteed and may change in the future.
- Notwithstanding ongoing monitoring of the underlying assets within the Fund, there can be no assurance that the performance of the Fund will achieve its stated objectives.
- The Fund may contain shares or units in underlying funds that do not permit dealing every day. Investments in such funds will only be realizable on their dealing days. It is not possible to assess the proper market price of these investments other than on the fund's dealing days.
- No borrowing will be undertaken by the Fund save for the purpose of short term liquidity requirements. Borrowings will not exceed 10% of the NAV of the Fund. For such purpose the securities of the Fund may be pledged. No scrip borrowing will be allowed.
- The Manager has the right to close the Fund to new investors, in order to manage it more efficiently, in accordance with its mandate.
- Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.
- Investors are reminded that any forecasts and/or commentary included in this MDD are not guaranteed to occur, and merely reflect the interpretation of the public information and propriety research available to the Investment Manager at a particular point in time.
- This Report should be read in conjunction with the Scheme Particulars of IPFM Guernsey ICC Limited and the Fund Supplement, in which all fees and fund facts are disclosed.
- Copies of these Scheme Particulars, including the Fund Supplement, and the annual accounts of the Scheme, which provide additional information, are available, free of charge, upon request from IPFM Guernsey ICC Limited, Ground Floor, Dorey Court, Admiral Park, St Peter Port, Guernsey, GY1 2HT.
- This Report should not be construed as an investment advertisement, or investment advice or guidance or a proposal or recommendation in any form whatsoever, whether relating to the Fund or its underlying investments. It is for information purposes only and has been prepared and is made available for the benefit of the investors in the Fund.
- Whilst all care has been taken by the Cell Manager in the preparation of the information contained in this Report, neither the Investment Manager nor Cell Manager make any representations or give any warranties as to the correctness, accuracy or completeness of the information, nor does either the Investment Manager or Cell Manager assume liability or responsibility for any losses arising from errors or omissions in the information.

Fund Risk Profile

- Higher risk investments may be subject to sudden and large falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.
- The Fund will contain shares or units in underlying funds that invest internationally. The value of your investment and the income arising from it will therefore be subject to exchange rate fluctuations.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.
