Benchmark	CPI +5%
Dealing	Daily

No. of participatory interests	32 151 260
Minimum lump sum investment	R 5 000
Base currency	ZAR
Income declaration - Mar '22	0.00cpu
Income declaration - Sep '21	0.00cpu

## FUND OBJECTIVE

The objective of the Flagship IP Worldwide Flexible Fund of Funds is to deliver long term capital growth by investing in a focused portfolio of stringently selected global equity fund managers. Investments, on a see-through basis, will be diversified across geographic regions, in both developed and emerging markets, and diversifies single manager and single style risk associated with investing through one asset manager only. The fund may invest across all asset classes, but, through the cycle, equity exposure will be maintained at around 80%, with the objective to outperform the MSCI World Index (in rands) over the long term (5 years). Our formal benchmark is CPI +5% and the fund is classified in the Worldwide - Multi Asset - Flexible sector.

Transaction Costs (incl. VAT)	0.09%	0.10%
Total Investment Charge (incl. VAT)	2.42%	2.36%

## FUND COMMENTARY - SEPTEMBER 2022

The Flagship IP Worldwide Flexible Fund of Funds returned -0.7% over the month, below the fund's CPI +5% benchmark of +0.6%, but ahead of the sector's -3.2% fall, in what was a brutal month for global equity markets. The combination of higher-than-expected inflation, higher borrowing rates, the increasing likelihood of a European energy shortage, and a worldwide recession dragged equity indices across the globe deep into the red.

As required by legislation, we confirm that the fund has adhered to its policy objective and strategy.

September saw a continuation of sharp drawdowns in global stock markets. The S&P 500 was down more than 9% for the month, and is now down 24% year-to-date. The Nasdaq fared worse, falling 10.5% for the month – now down 32% year to date. Indices outside of the US did not fare much better during September: London's FTSE was down 5.2%, the Nikkei in Japan dropped 7%, and Hong Kong's Hang Seng index closed 13.5% lower.

coupled with massive fiscal spending plans, condemnation from the market for Truss's new economic policies was swift, as the Sterling almost reached parity with the dollar and UK gilts rocketed above 5%. In an embarrassing move, Truss and new Chancellor Kwasi Kwarteng were forced to backtrack on their plans within a week – in what will be seen as a substantial blow to confidence in the new leader.

The catalyst for much of this was the US CPI print for August which came in at 8.3% – higher than market expectations. The Fed also strongly indicated that rates will continue to rise to get inflation under control – as was evident by another 75 basis point hike during the month. Inflation in the UK came in at 9.9%, while Eurozone inflation breached 10% for the first time on record, driven by a massive 40% increase in the energy component. The fears of an inevitable economic slowdown sent prices of Brent Crude Oil down 9% during September – now down 23% over the last 3 months.

South African investors also endured a red month in September, with the JSE All Share Index ending 5.2% lower. The South African Reserve Bank also increased lending rates by 75 basis points during the month, and the prime rate now sits at 9.75%. The panel was reportedly split between a 75 and a 100bp point hike – implying a hawkish tone. The bank's internal projections suggest they are near the target rate for the end of 2023 – indicating a front-loading approach in the fight against inflation, and the potential for a cooling of the hiking cycle going forward.

News headlines in September were dominated by the passing of Queen Elizabeth after a reign of 70 years. Over this period, she lived through 15 prime ministers, starting with Winston Churchill, born in 1874, and ending with Lizz Truss, born in 1975, the latter enduring a torrid start to her appointment as prime minister. After announcing some of the largest tax cuts in UK history.

Politically, it was an awful month for Ramaphosa and the ANC. Ramaphosa was not selected as the preferred candidate for leadership of the ANC in KZN – with the province nominating disgraced former Minister of Health, Dr Zweli Mkize – and Gwede Mantashe was booted off the stage at Cosatu's annual conference, evidence of an increasingly fragile tri-partite alliance.

- Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments.
- The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio.
- Unit trusts are traded at ruling prices and can engage in scrip lending subject to the limits and conditions imposed by the Act.
- The manager may borrow up to 10% of the market value of the collective investment scheme portfolio to ensure liquidity.
- Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, Uncertificated Securities Tax, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue.
- A schedule of fees, charges and maximum commissions is available on request. Commission and incentives may be paid, and if so, are included in the overall costs.
- The unit trust portfolios are priced daily at 15h00 (quarter end 17h00), using forward pricing. Dealing cut-off time is 14h30 daily.
- Units will be repurchased by the manager at the ruling price calculated in accordance with the requirements of the Act and the relevant deeds and paid to the investor only. Subject to occurrences beyond the control of Flagship Asset Management (FAM), transaction requests received by FAM before 14h30 will be actioned at that day's price. Monies from the repurchase of units will not be paid to third party bank accounts.
- FAM reserves the right to repurchase unit balances with a market value less than the minimum monthly investment amount and close the investment account. Investors will be notified beforehand should this be contemplated.
- Portfolio performance is calculated on a NAV to NAV basis and does not take any initial fees into account. Figures quoted are from Reuters and Moneymate for a lump sum using NAV-NAV prices with income distributions reinvested. Income is reinvested on the ex-dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Investment performance calculations are available for verification upon request.
- Income distributions for the fund occur bi-annually on 31 March and 30 September.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request.
- SARS requires us to pay over Dividend Withholding Tax (DWT) on your behalf where applicable. We will deduct this tax before we pay any dividends to you or reinvest into your account. Unless we receive information from you indicating otherwise, we will be obliged to withhold the default DWT of 20%.
- The EAC is a standard industry measure which has been introduced to allow you to compare the charges you incur and their impact on the investment returns over specific periods. Please visit <http://www.ipmc.co.za/effectiveannual-cost> to address the EAC illustrator. You can request an EAC calculation from [clientservices@ipmc.co.za](mailto:clientservices@ipmc.co.za) or call us on 021 673-1340
- Fund prices are published daily and available in newspapers countrywide, as well as on our website, [www.flagshipsa.com](http://www.flagshipsa.com). Also available on our website is additional information on the unit trust portfolio, including our Application Form. FAM reserves the right to only process instructions that are submitted on FAM standard transaction forms.
- Flagship Asset Management (Pty) Ltd is an authorised financial services provider (FSP 577). Trustees / custodians for the scheme are Standard Bank of South Africa Ltd – contact [compliance-IP@standardbank.co.za](mailto:compliance-IP@standardbank.co.za). IP Management Company Reg. No. 2007/01760/07 is the authorised manager of the scheme – contact 021 673 1340 or [clientservice@ipmc.co.za](mailto:clientservice@ipmc.co.za). IP Management Company (RF) (Pty) Ltd is a member of the Association for Savings & Investment SA (ASISA).
- The Manager retains full legal responsibility of the Fund, regardless of co-naming arrangements.
- Additional information including the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from [info@flagshipsa.com](mailto:info@flagshipsa.com).
- A statement of changes in the composition of the portfolio during the reporting period is available on request.
- Complaints should be in writing and clearly marked for the attention of the Compliance Officer and should be mailed to Private Bag X21, Constantia, 7848.

The Flagship IP Worldwide Flexible Fund of Funds is a Worldwide-Asset Allocation portfolio in the Flexible Portfolio Sector. The primary objective of the portfolio is to offer medium to long-term capital growth. The portfolio will invest in a range of participatory interests in equity, bond, money or property markets, in portfolios of collective investment schemes.

In order to achieve its objective, the investments normally to be included in the Flagship IP Worldwide Flexible Fund of Funds will, apart from assets in liquid form, consist of participatory interests of portfolios of collective investment schemes or other similar schemes, in equity, bond, money or property markets, registered in the Republic of South Africa, or of portfolios of collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the Manager and the Trustee, and comply with the requirements of the Act and any regulations thereto.

From 1 July 2019 to 30 June 2022 2.26% of the value of the fund was incurred as expenses relating to the administration of the fund. 0.10% of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund. Therefore, 2.36% of the value of the fund was incurred as costs relating to the investment of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

- The investment philosophy is medium to long term in nature but with a conservative bias. The use of several managers diversifies the single-manager and single-style risk associated with investing through one asset manager only. Asset allocation is adjusted according to changes in market conditions..

- Shares are potentially volatile investments and there is a risk of capital loss over the short term.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.
- Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
