Income declaration - Sep '21	0.00c
Dealing	Daily

FUND OBJECTIVE

The Fund invests directly into the Flagship Global Icon Fund IC Limited, registered in Guernsey. That fund seeks to provide long-term capital appreciation by investing in high-quality companies that the Fund Manager believes will generate superior returns over the long-term. Such companies typically have a franchise in the form of a hard-to-replicate intangible asset (such as a brand, culture or intellectual property) that leads to an enduring competitive advantage and a dominant market position.

FUND COMMENTARY - FEBRUARY 2023

The Flagship IP Global Icon Feeder Fund returned -0.4% vs +2.4% for the MSCI ACWI (both in ZAR) as equity markets retreated in February, but the fund's benchmark was held up by a steep 5.4% decline in the rand. The pressure in global markets stemmed from investors now fearing that inflation might remain stickier for longer than expected.

The biggest contributors for the month were Applied Materials, Anheuser Busch, and Microsoft – while the main detractors were Capri Holdings, Zalando, and International Food and Fragrances.

As required by legislation, we confirm that the fund has adhered to its policy objective and strategy.

After starting the year firmly in the green, most global equity indices gave up gains in February. The S&P was down 2.5%, surprisingly more than the tech-heavy Nasdaq which fell only 1%. Globally, the MSCI ACWI was down 2.8%, while Hong Kong's Hang Seng index lost more than 12%. Stocks fared better in Europe, with London's FTSE and the Euro Stoxx both gaining 1.8%.

The war in Ukraine reached the grim milestone of entering its second year. There can be no doubt that the invasion has not panned out as Putin envisioned, and in many respects the outlook is deteriorating. The West appears resolute in their response, upping the ante by providing offensive weaponry such as battle tanks – a step previously ruled out.

The US saw a further 25 basis point rate hike in January, but with inflation cooling less than expected (at 6.4% ahead of consensus of 6.2%), the consensus now seems to be that rates will stay higher for longer. There were more indicators that inflation may well remain sticky, as the Producer Price index, as well as the Personal Consumption Index – both key gauges monitored by the Federal Reserve – also came in higher than expected. Predictably, traders are now pricing in more rate hikes in the US, resulting in the Dollar rallying this month, gaining 2.5% vs the British Pound and almost 5% vs the Japanese Yen.

The local bourse also gave up some ground in February, with the Allshare losing 2.2%. The latest inflation reading of 6.9% came down slightly (previously 7.2%). The Rand, like most other currencies, weakened considerably against the dollar in February – with one greenback now costing 5.4% more.

The biggest news story this month was no doubt outgoing Eskom boss, Andre de Ruyter's bombshell interview. If the allegations are true, it would implicate some ANC bigwigs at the highest levels in government of corruption at a grand scale, and no-doubt implicate many others for at least having in-depth knowledge of looting at the ailing utility.

Earlier in February, Chinese stocks rallied after the best manufacturing activity numbers in more than a decade emerged from the country. However, market fears resurfaced after the disappearance of (yet) another Chinese banking boss, as well as geopolitical tensions ramping up, leading to losses for major Chinese firms.

The ANC is quite clearly feeling the heat ahead of the national elections next year, declaring a state of disaster as the rolling blackouts that have been a constant throughout 2022/2023, threatens their popularity at the ballot box.

- Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments.
- The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio.
- Unit trusts are traded at ruling prices and can engage in scrip lending subject to the limits and conditions imposed by the Act.
- The manager may borrow up to 10% of the market value of the collective investment scheme portfolio to ensure liquidity.
- Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, Uncertificated Securities Tax, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue.
- A schedule of fees, charges and maximum commissions is available on request. Commission and incentives may be paid, and if so, are included in the overall costs.
- The unit trust portfolios are priced daily at 15h00 (quarter end 17h00), using forward pricing. Dealing cut-off time is 14h30 daily.
- Units will be repurchased by the manager at the ruling price calculated in accordance with the requirements of the Act and the relevant deeds and paid to the investor only. Subject to occurrences beyond the control of Flagship Asset Management (FAM), transaction requests received by FAM before 14h30 will be actioned at that day's price. Monies from the repurchase of units will not be paid to third party bank accounts.
- FAM reserves the right to repurchase unit balances with a market value less than the minimum monthly investment amount and close the investment account. Investors will be notified beforehand should this be contemplated.
- Portfolio performance is calculated on a NAV to NAV basis and does not take any initial fees into account. Figures quoted are from Reuters and Moneymate for a lump sum using NAV-NAV prices with income distributions reinvested. Income is reinvested on the ex-dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Investment performance calculations are available for verification upon request.
- Income distributions for the fund occur bi-annually on 31 March and 30 September.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request.
- SARS requires us to pay over Dividend Withholding Tax (DWT) on your behalf where applicable. We will deduct this tax before we pay any dividends to you or reinvest into your account. Unless we receive information from you indicating otherwise, we will be obliged to withhold the default DWT of 20%.
- The EAC is a standard industry measure which has been introduced to allow you to compare the charges you incur and their impact on the investment returns over specific periods. Please visit <http://www.ipmc.co.za/effectiveannual-cost> to address the EAC illustrator. You can request an EAC calculation from clientservices@ipmc.co.za or call us on 021 673-1340
- Fund prices are published daily and available in newspapers, on Bloomberg (Class A: BBG00XGC3Y32 | Class B: BBG00XGC5D09), as well as on our website, www.flagshipsa.com. Also available on our website is additional information on the unit trust portfolio, including our Application Form. FAM reserves the right to only process instructions that are submitted on FAM standard transaction forms.
- Flagship Asset Management (Pty) Ltd is an authorised financial services provider (FSP 577). Trustees / custodians for the scheme are Standard Bank of South Africa Ltd – contact compliance-IP@standardbank.co.za. IP Management Company Reg. No. 2007/01760/07 is the authorised manager of the scheme – contact 021 673 1340 or clientservice@ipmc.co.za. IP Management Company (RF) (Pty) Ltd is a member of the Association for Savings & Investment SA (ASISA).
- The Manager retains full legal responsibility of the Fund, regardless of co-naming arrangements.
- Additional information including the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from info@flagshipsa.com.
- A statement of changes in the composition of the portfolio during the reporting period is available on request.
- Complaints should be in writing and clearly marked for the attention of the Compliance Officer and should be mailed to Private Bag X21, Constantia, 7848.

The Flagship IP Global Icon Feeder Fund is in the Global - Equity - General sector and invests directly into the Flagship Global Icon Fund IC Limited, registered in Guernsey. That fund seeks to provide long-term capital appreciation by investing in high-quality companies that the Fund Manager believes will generate superior returns over the long-term. Such companies typically have a franchise in the form of a hard-to-replicate intangible asset (such as a brand, culture or intellectual property) that leads to an enduring competitive advantage and a dominant market position. The fund will, at all times, be fully invested in the master fund and, as such, does not allow for any asset allocation flexibility and will not invest in any financial instruments to implement specific investment views.

From 1 January 2022 to 31 December 2022 1.99% of the value of the fund was incurred as expenses relating to the administration of the fund. 0.00% of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund. Therefore, 1.99% of the value of the fund was incurred as costs relating to the investment of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

- The fund managers seek to reduce risk by investing in a range of assets diversified across sectors and geographies, with the flexibility to vary exposures as market circumstances dictate.

The diagram illustrates a risk-reward spectrum. It consists of seven numbered boxes (1 to 7) arranged horizontally. Above the boxes is a double-headed arrow. The left end of the arrow is labeled 'LOWER RISK' and 'Potentially lower reward'. The right end is labeled 'HIGHER RISK' and 'Potentially higher reward'. Box 6 is highlighted in dark grey, while boxes 1-5 and 7 are light grey.

- Shares are potentially volatile investments and there is a risk of capital loss over the short term.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.
- Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
