Minimum lump sum investment	R 5 000
Base currency	ZAR
Income declaration - Mar '23	0.00cpu
Income declaration - Sep '23	0.23cpu
Dealing	Daily

## FUND OBJECTIVE

To provide long term capital growth from an actively managed portfolio comprising equities, bonds, listed property and cash – both local and foreign. To achieve long term capital growth, the fund will have a bias towards equity (which typically offers the best returns over the long run), but no guidelines have been set for maximum and minimum exposures to any one asset class. Our benchmark is 60% equities, 20% bonds and 20% cash with each category split equally between local and international assets. The fund is classified with ASISA as a Worldwide - Multi Asset - Flexible fund.

<b>Total Investment Charge</b> (incl. VAT)	<b>2.59%</b>	<b>2.59%</b>

## FUND COMMENTARY - JANUARY 2024

The Flagship IP Worldwide Flexible Fund returned 0.8% vs its composite benchmark which was up 0.5% (both in ZAR), as global markets started the new year on a mixed note.

The biggest contributors for the month were Meta Platforms and Novo Nordisk, while the main detractors were Blue Label and PDD Holdings. During the month, we entered new positions in Novo Nordisk, Abercrombie & Fitch, Alpha Metallurgical Resources and PDD Holdings, while closing positions in SLB, Diageo, Alibaba, Bece, United Health, Reckitt Benckiser and Informa.

As required by legislation, we confirm that the fund has adhered to its policy objective and strategy.

## MARKET COMMENTARY

After ending 2023 on a strong note, global equity indices delivered a mixed start to 2024. In the US, both the S&P 500 and Nasdaq improved by 1.7% and 1.0% respectively. The Russell 2000 had a tough start to the year, though, dropping by 3.9%. In the UK, the FTSE 100 fell 1.3%, while in the Asia there were vastly different results on opposite sides of the East China Sea. Japan's Nikkei gained 8.4%, while Hong Kong's Hang Seng lost 9.2%.

The latest US CPI reading showed an uptick, increasing by 3.4% on a year-over-year basis (forecast at 3.2% and December at 3.1%), contributing to the Fed's more cautious commentary on the prospects of near-term rate cuts. January has delivered some signs of weakness in the job market, though, with UPS alone announcing 12,000 job cuts. The Fed continues its tightrope balancing act between taming inflation and maximum employment.

In US politics, the race for the top 2 Republican nominees is as good as done. Donald Trump started the primaries strongly, winning both Iowa and New Hampshire. This led to his main rival, Florida Governor Ron deSantis, dropping out very early in the race, and almost guaranteeing Trump the position of Republican nominee. Reports have emerged that Trump is targeting a massive trade war with China if re-elected as president. This would obviously cause ripple effects across global markets.

The US is one of more than 50 countries holding elections this year – in what is being billed as one of the biggest election years in history. Taiwan kicked off the year with a victory for the pro-democracy (and thus anti-China) party, representing another blow to the struggling Chinese economy, which is reeling from its property sector crisis and rising unemployment. The ruling Communist Party have tried a number of approaches to stem the subsequent bleeding in its stock market, but these efforts have largely failed.

South African investors experienced a red month to start the year. The All Share lost 2.9%, the Resources index dropped 6.3%, and the Rand weakened 1.8% against the US Dollar.

The year ahead will almost certainly be dominated by the looming general election – potentially a pivotal year in South Africa's history. The ANC, after more than 30 years in power, faces the real possibility of losing their majority, as the party continues to be plagued by corruption, maladministration, and internal power struggles. This would open the door for a number of different coalition scenarios. In what promises to be the first of many, the looming election has already produced its first shake up – as former president Jacob Zuma was officially suspended from the ANC after backing the newly formed MK party. Perhaps this is a sign of things to come for the governing party...

## Risk Considerations and Important Information

- Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments.
- The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio.
- Unit trusts are traded at ruling prices and can engage in scrip lending subject to the limits and conditions imposed by the Act.
- The manager may borrow up to 10% of the market value of the collective investment scheme portfolio to ensure liquidity.
- Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, Uncertificated Securities Tax, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue.
- A schedule of fees, charges and maximum commissions is available on request. Commission and incentives may be paid, and if so, are included in the overall costs.
- The unit trust portfolios are priced daily at 15h00 (quarter end 17h00), using forward pricing. Dealing cut-off time is 14h30 daily.
- Units will be repurchased by the manager at the ruling price calculated in accordance with the requirements of the Act and the relevant deeds and paid to the investor only. Subject to occurrences beyond the control of Flagship Asset Management (FAM), transaction requests received by FAM before 14h30 will be actioned at that day's price. Monies from the repurchase of units will not be paid to third party bank accounts.
- FAM reserves the right to repurchase unit balances with a market value less than the minimum monthly investment amount and close the investment account. Investors will be notified beforehand should this be contemplated.
- Portfolio performance is calculated on a NAV to NAV basis and does not take any initial fees into account. Figures quoted are from Reuters and Moneymate for a lump sum using NAV-NAV prices with income distributions reinvested. Income is reinvested on the ex-dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Investment performance calculations are available for verification upon request.
- Income distributions for the fund occur bi-annually on 31 March and 30 September.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request.
- SARS requires us to pay over Dividend Withholding Tax (DWT) on your behalf where applicable. We will deduct this tax before we pay any dividends to you or reinvest into your account. Unless we receive information from you indicating otherwise, we will be obliged to withhold the default DWT of 20%.
- The EAC is a standard industry measure which has been introduced to allow you to compare the charges you incur and their impact on the investment returns over specific periods. Please visit <http://www.ipmc.co.za/effectiveannual-cost> to address the EAC illustrator. You can request an EAC calculation from [clientservices@ipmc.co.za](mailto:clientservices@ipmc.co.za) or call us on 021 673-1340
- Fund prices are published daily and available in newspapers countrywide, as well as on our website, [www.flagshipsa.com](http://www.flagshipsa.com). Also available on our website is additional information on the unit trust portfolio, including our Application Form. FAM reserves the right to only process instructions that are submitted on FAM standard transaction forms.
- Flagship Asset Management (Pty) Ltd is an authorised financial services provider (FSP 577). Trustees / custodians for the scheme are Standard Bank of South Africa Ltd – contact [compliance-IP@standardbank.co.za](mailto:compliance-IP@standardbank.co.za). IP Management Company Reg. No. 2007/01760/07 is the authorised manager of the scheme – contact 021 673 1340 or [clientservice@ipmc.co.za](mailto:clientservice@ipmc.co.za). IP Management Company (RF) (Pty) Ltd is a member of the Association for Savings & Investment SA (ASISA).
- The Manager retains full legal responsibility of the Fund, regardless of co-naming arrangements.
- Additional information including the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from [info@flagshipsa.com](mailto:info@flagshipsa.com).
- A statement of changes in the composition of the portfolio during the reporting period is available on request.
- Complaints should be in writing and clearly marked for the attention of the Compliance Officer and should be mailed to Private Bag X21, Constantia, 7848.

## Investment Policy

The Flagship IP Worldwide Flexible Fund is a Worldwide-Asset Allocation portfolio in the Flexible Portfolio Sector. The primary objective of the Flagship IP Worldwide Flexible Fund is to offer medium to long-term capital growth. The portfolio will invest in a flexible combination of investments in equity, bond, money or property markets to maximise total returns over the long term. The portfolio will be actively managed with exposure to various asset classes being varied to reflect changing economic and market circumstances, in order to maximise returns for investors.

In order to achieve its objective, the investments normally included in the Flagship IP Worldwide Flexible Fund will comprise a combination of local and foreign securities, exchange securities, stock including loan stock, financially sound listed property investments and participatory interests in portfolios of collective investment schemes in property shares, assets in liquid form and any other securities which are considered consistent with the portfolio's primary objective and the Act or the Registrar may from time to time allow, all to be acquired at fair market value. To the extent permitted by legislation, the fund may use exchange traded funds and financial instruments to implement specific investment views.

## TER and Transaction Costs

From 1 October 2020 to 30 September 2023 2.18% of the value of the fund was incurred as expenses relating to the administration of the fund. 0.41% of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund. Therefore, 2.59% of the value of the fund was incurred as costs relating to the investment of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

## Fund Risk Profile

- The fund managers seek to reduce risk by investing in a range of assets diversified across sectors and geographies, with the flexibility to vary exposures as market circumstances dictate.

- Shares are potentially volatile investments and there is a risk of capital loss over the short term.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.
- Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
