Base currency	ZAR
Mar'24 income decl. [CLASS A]	0.73cpu
Sep'23 income decl. [CLASS A]	3.22cpu

## FUND OBJECTIVE

The objective of the Flagship IP Balanced Fund is to seek steady growth of both capital and income through investments in a broad range of asset classes in a balanced manner. This Regulation 28 managed fund is classified as South African - Multi Asset - High Equity and aims to maximize returns over the medium to long term utilising flexible asset allocation strategies taking active decisions in accordance with current and projected economic and market conditions. The fund invests in equities, bonds, property and money market and is restricted to maximum limits in accordance with prudential regulations which, inter alia, provide that equity, held both locally and abroad, will not exceed 75% of the fund and offshore investment is restricted to 30% of the fund. Out-performance is targeted through aggressive asset allocation and focused stock selection based on in-house proprietary models and extensive internal and external research. The portfolio uses financial instruments only to the extent permitted by legislation.

Transaction Costs (incl. VAT)	0.16%	0.21%
Total Investment Charge (incl. VAT)	2.31%	2.41%

## FUND COMMENTARY - APRIL 2024

The Flagship IP Balanced Fund returned +1.0% over the month, well ahead of the sector average benchmark's decline of -0.5%, but behind the JSE Allshare's return of 2.1%. The JSE's strong showing was driven by the Resource sector (+7.1%), with Anglo posting a meaningful return of +32.6% following the proposed \$43bn BHP Group bid for the company. The technology sector also contributed meaningfully to the local market's healthy gains with Naspers (+7.4%) and Prosus (+6.7%) following Tencent (+12.6%) higher. Fund performance was driven by the three counters above – all top 10 holdings – together with a +10.5% rise in Mondi, but large declines in Sasol (-9.0%) and Richemont (-8.3%) muted the overall gains.

As required by legislation, we confirm that the fund has adhered to its policy objective and strategy.

MARKET COMMENTARY

After starting the year on the trot, equity markets finally paused for breath in April. In the US, the benchmark S&P 500 gave up 4.1%, while the tech-heavy Nasdaq lost 4.4%, and the small-cap Russell 2000 lost 7.0%. Markets fared better across the pond, with the UK's FTSE 100 index rising by 2.7%. In the East, there was a large swing in the trend of recent performance, as Japan's Nikkei declined by 4.9% while Hong Kong's Hang Seng gained 7.5%, putting it back into green territory for the year.

In the US, it was a 3<sup>rd</sup> consecutive, higher-than-expected, inflation report that was partly to blame for the weaker performance . This dashed hopes of any rate cuts in the near future, particularly as the job market has remained incredibly resilient up to this point. Economic data published during the first days of May provided a different perspective, however, as cracks seemingly appeared in the jobs numbers. This highlights the tightrope on which Jerome Powell and the Federal Reserve currently find themselves, as different data points now suggest different required courses of action.

The uncertainty around the best path forward for US monetary policy led investors to seek some safety in traditional havens with gold reaching a new all-time high during the month. Other commodities also had good gains, as the price of copper and iron ore increased by 13.9% and 12.8% respectively.

It was another concerning month from a geopolitical perspective. As was widely expected, Iran launched a retaliatory attack against Israel, directly from Iranian soil. The attack reportedly consisted of more than 300 drones and missiles, most of which were shot down by Israeli defence systems. Thankfully, the situation was largely defused, lessening the chances of a broader regional conflict. The US House of Representatives approved another \$60 billion aid package for Ukraine, fast tracking the delivery of much needed equipment, vehicles and long-range missiles to the frontlines. The US is also drafting sanctions against Chinese banks that are reportedly aiding the Russian war effort. Although China has heeded Western calls not to provide any arms directly to Russia, it has now become the primary supplier of circuitry, aircrafts parts and machines, allowing Russia to rebuild its military capacity.

Back home, local investors experienced a good month, as the JSE All Share rose 2.1%, with the resources index gaining more than 7.1%. The Rand also put in a good performance, strengthening by 0.9% against the US Dollar.

All eyes this month will be on the national and provincial elections, likely to be a pivotal election year in the history of South Africa's democracy, as all polls now point to the ANC losing their majority – with odds suggesting the country's first coalition government at national level.

Risk Considerations and Important Information

- Collective Investment Schemes in Securities (unit trusts) are generally medium to long term investments.
- The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio.
- Unit trusts are traded at ruling prices and can engage in scrip lending subject to the limits and conditions imposed by the Act.
- The manager may borrow up to 10% of the market value of the collective investment scheme portfolio to ensure liquidity.
- Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions (brokerage, Uncertificated Securities Tax, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue.
- A schedule of fees, charges and maximum commissions is available on request. Commission and incentives may be paid, and if so, are included in the overall costs.
- The unit trust portfolios are priced daily at 15h00 (quarter end 17h00), using forward pricing. Dealing cut-off time is 14h30 daily.
- Units will be repurchased by the manager at the ruling price calculated in accordance with the requirements of the Act and the relevant deeds and paid to the investor only. Subject to occurrences beyond the control of Flagship Asset Management (FAM), transaction requests received by FAM before 14h30 will be actioned at that day's price. Monies from the repurchase of units will not be paid to third party bank accounts.
- FAM reserves the right to repurchase unit balances with a market value less than the minimum monthly investment amount and close the investment account. Investors will be notified beforehand should this be contemplated.
- Portfolio performance is calculated on a NAV to NAV basis and does not take any initial fees into account. Figures quoted are from Reuters and Moneymate for a lump sum using NAV-NAV prices with income distributions reinvested. Income is reinvested on the ex-dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Investment performance calculations are available for verification up request.
- Income distributions for the fund occur bi-annually on 31 March and 30 September.
- Annualised returns are period returns re-scaled to a period of 1 year. This allows investors to compare returns of different assets that they have owned for different lengths of time. Actual annual figures are available to investors upon request.
- SARS requires us to pay over Dividend Withholding Tax (DWT) on your behalf where applicable. We will deduct this tax before we pay any dividends to you or reinvest into your account. Unless we receive information from you indicating otherwise, we will be obliged to withhold the default DWT of 20%.
- The EAC is a standard industry measure which has been introduced to allow you to compare the charges you incur and their impact on the investment returns over specific periods. Please visit <http://www.ipmc.co.za/effectiveannual-cost> to address the EAC illustrator. You can request an EAC calculation from [clientservices@ipmc.co.za](mailto:clientservices@ipmc.co.za) or call us on 021 673-1340
- Fund prices are published daily and available in newspapers countrywide, as well as on our website, [www.flagshipsa.com](http://www.flagshipsa.com). Also available on our website is additional information on the unit trust portfolio, including our **Application Form**. FAM reserves the right to only process instructions that are submitted on FAM standard transaction forms.
- Flagship Asset Management (Pty) Ltd is an authorised financial services provider (FSP 577). Trustees / custodians for the scheme are Standard Bank of South Africa Ltd – contact [compliance-IP@standardbank.co.za](mailto:compliance-IP@standardbank.co.za). IP Management Company Reg. No. 2007/01760/07 is the authorised manager of the scheme – contact 021 673 1340 or [clientservice@ipmc.co.za](mailto:clientservice@ipmc.co.za). IP Management Company (RF) (Pty) Ltd is a member of the Association for Savings & Investment SA (ASISA).
- The Manager retains full legal responsibility of the Fund, regardless of co-naming arrangements.
- Additional information including the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from [info@flagshipsa.com](mailto:info@flagshipsa.com).
- A statement of changes in the composition of the portfolio during the reporting period is available on request.
- Complaints should be in writing and clearly marked for the attention of the Compliance Officer and should be mailed to Private Bag X21, Constantia, 7848 or emailed to [complaints@ipmc.co.za](mailto:complaints@ipmc.co.za).

Investment Policy

The Flagship IP Balanced Fund is to be a domestic, asset-allocation, prudential variable portfolio. The primary objective of the fund is to seek steady but stable growth of both capital and income through investments in a broad range of asset classes in a balanced manner. In order to achieve its objective, the investments normally to be included will comprise a combination of securities in the equity, bond, property and money markets. The portfolio will have an equity exposure (including international equity) between 0% and 75% at all times. Investments to be included in the Flagship IP Balanced Fund will comprise a combination of securities and assets in liquid form which are considered consistent with the portfolio's primary objective and that the Act or the Registrar may from time to time allow, all to be acquired at fair market value. The portfolio may also include participatory interests or any other form of participation in portfolios of collective investment schemes registered in South Africa or operated in territories with a regulatory environment which is to the satisfaction of the Manager and the Trustee and as legislation permits. Nothing contained in the investment policy shall preclude the manager from varying the ratio of the aforementioned securities relative to each other (except as required by the Act), or the assets themselves, to maximise capital growth and investment potential, should changing economic factors or market conditions so demand. Provided also that nothing contained in the investment policy shall preclude the Manager from retaining cash in the portfolio and / or placing cash on deposit in terms of the deed. Provided further that the Manager shall ensure that the portfolio includes securities and assets in liquid form, of at least the aggregate value required, from time to time, by the Act. The Manager will be permitted to invest on behalf of the portfolio in offshore investments as legislation permits. The Manager will be permitted to invest on behalf of the portfolio in financial instruments as legislation permits. The portfolio will be managed so as to comply with prudential requirements with which a pension fund investment strategy must comply in terms of applicable legislation. For the purpose of this portfolio, the manager shall reserve the right to close the portfolio to new investors on a date determined by the manager. This will be done in order to be able to manage the fund in accordance with its mandate. The manager may, once a portfolio has been closed, open that portfolio again to new investors on a date determined by the manager.

TER and Transaction Costs

From 1 January 2021 to 31 December 2023 2.20% of the value of the fund was incurred as expenses relating to the administration of the fund. 0.21% of the value of the fund was incurred as costs relating to the buying and selling of the assets underlying the fund. Therefore, 2.41% of the value of the fund was incurred as costs relating to the investment of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

Fund Risk Profile

- The fund managers seek to reduce risk by investing in a range of assets diversified across sectors and geographies, with the flexibility to vary exposures as market circumstances dictate.

- Shares are potentially volatile investments and there is a risk of capital loss over the short term.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.
- Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
