INVESTMENT OBJECTIVE

The Fund's aim, first and foremost, is the protection of client capital in real terms, followed by inflation-beating growth at an acceptable level of risk. The Fund has flexibility in terms of its asset allocation strategies and can be invested in equities, bonds, cash and the property market, but over the long-term, it will be managed in an equity-centric manner. To identify the best global investment opportunities, the Fund is style agnostic; uses bottom-up fundamental analysis; quantitative and technical analysis tools; and top-down, macro screeners.

FUND MANAGER COMMENTARY - MARCH 2026

The Flagship Worldwide Flexible Fund (\$) endured a poor month as markets declined sharply amid escalating conflict in the Middle East, driving up oil prices and volatility levels.

The biggest contributors for the month were APA Corp, Stonex Group and United Natural Foods, while the main detractors were Blu Label, Micron and Coeur Mining.

As required by legislation, we confirm that the fund has adhered to its policy objective and strategy.

INVESTMENT COMMENTARY

March '26 saw a meaningful pullback in equity markets across the globe as the conflict in the Middle East proved to be the main driver of performance. In the US, the S&P500 was down 5.0%, while the Nasdaq composite declined by 4.7%. London's FTSE declined by 6.2% while the Euro Stoxx lost 9.3%. There was plenty of pain in the East as well, as the Nikkei declined by 12.7%, and Hong Kong's Hang Seng finished the month 6.6% lower. South Korea's Kospì, one of the world's best performing markets over the past year, experienced its worst day on record, dropping 12% in a single session.

With news flow driven and dominated by the conflict and subsequent disruption to oil supplies, and the Strait of Hormuz mostly shut following the US-Israeli strikes that killed Iran's Supreme Leader, inflation concerns have re-entered the equation. Brent Crude futures increased by 63% during the month, hovering around \$120 per barrel at month end. The volatility was extreme, with prices touching \$120 and \$80/barrel within a 24-hour period. Sentiment was not helped by statements from IEA officials that oil supply disruptions are unprecedented in scale, leading to only its sixth emergency release during the organization's 52-year history.

The renewed inflation concerns saw rates kept steady at the FOMC and any chance of rate cuts for the year have (probably) been eliminated, with futures now pricing in a 35% chance of a hike by October. This lower likelihood of further rate cuts, and a search for liquidity, led to selling pressure on gold, which declined by 11.6%. The precious yellow metal experienced its biggest weekly drop since 1983.

Military escalations in the Middle East have been severe, with rhetoric around war shifting multiple times, making short-term predictions somewhat useless, with markets influenced more by social media posts than market fundamentals. One gets the feeling, however, that Iran's hand for future negotiations gets stronger with each day, providing them incentive to reject ceasefire or peace deals put on the table. Trump, meanwhile, risks isolating the US, as he shifts between threatening allies and asking for their help.

To add additional volatility, private credit concerns have also surfaced, with several prominent names (including Apollo, Blackrock, Blackstone, Morgan Stanley) refusing to honour the agreed upon redemption schedule as fears of overspending in the AI space has debt investors on edge.

TER

The Flagship Worldwide Flexible Fund (\$) Class A USD has a Total Expense Ratio (TER) of 1.90%. Financial year-end TER 1.90%. The Total Expense Ratios (TERs) are the percentages of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TERs. As the Fund has been operational for a period of less than one year, the TER to 31 December 2025 is based on estimated data on costs and actual fees incurred. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

Fund Risk Profile

- Higher risk investments may be subject to sudden and large falls in value in comparison to other investments. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt.
- The Fund will contain shares or units in underlying funds that invest internationally. The value of your investment and the income arising from it will therefore be subject to exchange rate fluctuations.
- Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.
